

Prices are UK Retail, including VAT @ 17.5%

For any feature you choose, select the price in question by ringing it.

Making a choice is mandatory in Section 1; in Sections 2 - 4, if you do not make a choice, the default option (in bold) will be supplied; bikes will be supplied with standard equipment unless special selections are made in Sections 5 - 7.

Do not make more than one choice in a section except Section 4, where two colour choices may be made on all-steel bikes, and Sections 10 & 11.

The total price is the sum of the items you have selected.

Although we normally keep the same prices for a year, we reserve the right to alter prices without notice.

Weight-saving

Keeping weight to a minimum is a priority if you expect to carry the bike regularly. Whatever other features you choose, you can always save about a kilogramme by selecting a superlight bike in section 4. Additional savings can also be made by choosing an S Type, a 1- or 2-speed (i.e. without hub-gears), no mudguards, etc.

Notes

1. A pump is standard on all bikes except superlight bikes, or those without mudguards
2. For an inside leg over 82cm/32" (or 84cm/33" with a rail saddle, e.g. Vitesse/Brooks), you should almost certainly fit an extended or telescopic seat pillar; the latter is best for an inside leg over 89cm/35", or for taller riders wishing to minimise the height of the folded bike
3. Tyre-driven dynamo lighting can not be used in conjunction with Schwalbe Stelvio tyres
4. The luggage sets come complete with front carrier block and frame to attach the luggage to the Brompton; the S Bag is the only front luggage suitable for an S Type
5. The Rack Sack can only be configured on a bike with a rear rack
6. The titanium seat pillar is already configured on superlight bikes; this is an option for all-steel bikes only
